SANDRA KLINKENBERG • Advisory Business Economist, independent and liberal Economic, Business, Management and Administration Advisor

- enables innovation and development
- reduces complexity
- brings functionality
- creates an overview
- generates effectiveness
- improves processes
- develops concepts, methods, systems and procedures as well as guidelines, policies, framework conditions, standards and norms, etc. as well as your corporate governance
- designs and is committed to a livable and viable future for all with and also through future-relevant topics, aspects, areas and developments

I realise my value proposition through

- designing a coherent interplay of all topics and fields, aspects and areas within and outside of groups, companies, institutions, organisations, etc.
- development of knowledge – concepts and design for synergetic interaction within and outside organisations, such as companies, corporate bodies, institutions, etc.
- many years of experience in balanced development in the form of holistic sustainable development
 - STRUCTURE DEVELOPMENT • since 1992
- introduction, integration, implementation, revitalisation, maintenance, development and improvement of INTEGRATIVE® management systems that are individually adapted to the organisation, based on norms and standards and therefore also certifiable
- SMART tools, methods and procedures such as smart knowledge transfer and internal knowledge management • smart feedback • web-based strategic artificial intelligence • ...
- simple explanation of extensive and far-reaching topics

– **Complexity doesn't have to be complicated, it can also be easy!** Instead of breaking topics down into bite-sized chunks, the aim should be to prepare the relevant parts and aspects in such a way that they complement each other in a meaningful way and form a coherent overall picture. Clever structure and comprehensible connections make knowledge tangible – without losing any of its depth. **That's what it's all about!** –
